About Us

With humble beginnings as a small welding repair shop in 1943, today Walker Engineered Products designs and produces stainless processing equipment solutions for the dairy, food, beverage, chemical, and pharmaceutical industries around the world. Some of our core products include stainless steel vessels, silos, mixers/blenders, tank heads, and a range of custom fabricated equipment.

Walker Engineered Products is part of Wabash National Corporation, North America's leading producer of semi-trailers and liquid transportation systems. Leveraging Wabash National's heritage of

innovation, and dedication to quality and craftsmanship, our solutions are manufactured to the highest of standards and designed to meet your specific requirements. Our resources and expertise bring peace of mind among challenging application and delivery schedules.

Integrity Driven

All Walker solutions are delivered with the same care from day one, beginning with understanding your needs. Then, we use advanced modeling technologies to prove concept and engage experienced craftsmen in modern, innovative processes to deliver equipment of superb quality. We take pride in every weld and, more importantly, the relationships maintained long after the sale.
